

Emerging Professionals Group Colorado was formed in 2011 to engage emerging landscape architects in valuable discussions, networking events, and educational opportunities. A subsidiary to the American Society of Landscape Architects Colorado Chapter, EPG Colorado seeks to promote the field of landscape architecture through involvement with industry leaders, young professional groups, and municipalities of Colorado. Meetings are held bimonthly and topics vary from project presentations, to site visits, to design charrettes. Ultimately, EPG Colorado is a dynamic group that values innovation and diversity of design, we invite you to be part of our collaboration.

## Emerging Professionals Group Colorado CONVERGING ON UNION STATION

### Meeting 2:

Working with large-scale projects requires managing stakeholders, meeting zoning regulation and a meticulous articulated design vision. AECOM hot off the planning of Stapleton, is working on the Design of the new Union Station. Come and hear the challenges and techniques for large scale project implementation and organization.
