- 10:45 am Lighting Design Presentation
(Yvonne English, RLA)
- 11:30 am New Technology Demonstration
(Bob Klaidman)
- 12:00 pm BBQ / Networking

SPJ is a low voltage landscape lighting manufacturer and custom fabrication house where architects and designers enjoy the benefits of turning each job into a one-of-a-kind signature project. They are a leader in the use of LED technology. SPJ's *Forever Bright* systems offers warm color, reliability, and versatile LED options for every fixture in their catalog. *Forever Bright* technology now includes "Smart Systems" such as low voltage motion detection and emergency battery back-up products.

We will visit the manufacturing facility, hear an overview of landscape lighting design and see a demonstration of new technologies, including LEDs.

Please RSVP by March 16 to CRmaison@gmail.com

COST:

- Free Alumni Connection members *
- \$15 Non-AC members
