

EPTDESIGN - <http://www.eptdesign.com/> - a private firm practicing landscape architecture, urban design, and planning - is providing two summer internships on an unpaid basis, to assist in our studios and gain experience in practice. We will be selecting a Landscape Architecture Intern to be based in our Irvine studio, and a Sustainable Design Intern to be based in our Pasadena studio.

Activities of the Landscape Architectural intern include:

- Involvement in project development throughout various design phases to gain “real world” experience in areas of concept design, hand graphic development, CAD drawing development, cost estimating, and plant selection.
- Collection of photographs and graphics of our finished projects for marketing purposes, and insight on the marketing process of a private firm.
- Accompaniment with principals or associates on field visits to document the construction progress of our current projects.

Activities of the Sustainable Design intern include:

- Photograph projects and plants to be included in our image library (such as: native plants, natural schoolyard, rain garden, bioswale, gravel channel, rain barrel, etc)
- Photograph and document existing projects for a Case Study database on low impact development and sustainable design techniques in Southern California
- Conduct interviews and documentation for a Post Occupancy Evaluation database of our own projects

We would like to offer the opportunity to gain experience at a reputable firm with a nearly 50-year history in Southern California. The interns will be working primarily in one studio, but will occasionally travel to the other studio to present their work and collaborate with one other. Candidates should live in the area, or have pre-arranged accommodations, as these are unpaid positions, with no living or travel allowance available. Interns will work 20 hours per week, to be arranged upon selection. Candidates may need occasional access to a vehicle for field research, mostly within the Los Angeles basin.

Interested students in the internship program should send by May 1st the following items:

1. Current resume, with contact information
2. Statement of interest (1-page letter describing your interest in either internship, and why you want to work for **EPTDESIGN**)
3. Examples of graphic and written work not to exceed 10 pages
4. Entire package to be sent digitally, in pdf format, not to exceed 20 mb

Send materials to:

Landscape Architecture Intern:

Carrie Rybczynski, ASLA, LEED AP
