WEST STREET DROGHEDA COMPETITION:

PROFILE:

I am a Senior Landscape Architect with a proven track record in the successful delivery of large scale projects in both the public and private sector for one of Irelands leading design practices. Over my ten years' experience, I have project managed and contract administrated all work stages on a wide variety of projects including; both large and small scale; residential, commercial/ retail, mixed use, healthcare, amenity, streetscape, urban design, public realm and landscape strategy schemes. As an Associate and Senior Landscape Architect, my role included client relations and liaison, managing fee proposals, scopes of work, briefs, budgets, and schedules as well as the management of in house design teams and resources. I have lead and collaborated with both large and small design teams on high profile National and International design competitions. My leadership, organisational, and management skills contributed to the day to day operation of the landscape architectural division of a successful design practice in which I implemented the requirements for the ISO 9001:2008 Quality Management Systems, the ISO 14001:2004 Environmental Management Systems and managed the continued certification of the company. My design ethos is grounded in the development of original and appropriate design solutions; driven by the consideration of the genius loci, social, physical and historical context of a site and through the application of well-considered, tested and clever design solutions. My skills have been recognised by receiving national design awards to schemes on which I have been involved. My natural enthusiasm and flair for design drive my ambitions to meet and exceed the expectations of my colleagues, design team members, clients and end users. This is achieved through excellent communication skills, in depth construction knowledge and attention to detail with the aim to successfully deliver schemes, within budget and on programme that ultimately enhance people's lives.
