Navigating the Bureaucracy

X 495.40 Architecture 0.45 unit \$135

▶ This half-day course prepares the design professional for success when interacting with the many levels of bureaucracy that face the landscape architect and others in related fields. Instruction covers getting plans approved, requirements of the professional services consultant or contractor to government agencies, successfully obtaining a building permit, and best billing practices. This course is team taught by recognized experts in the areas of site plan review, plan check approval, government contract administration, and zoning. *Advance enrollment required; no enrollment at the door.*
