# Graphics Workshop:
Color Mastery™- Pasadena, CA

with Richard E. Scott, ASLA, ASAI

Quickly render superb plans and perspectives

February 7th & 8th, 2009
Saturday & Sunday, 9:00am – 6:00pm
Pasadena Conference Center

This will be the <u>only</u> Color Mastery Workshop on the West Coast in 2009

This program is 100% guaranteed to produce outstanding results...or the workshop is free

Here are just some of the questions we'll cover in 16 intensive and fun hours…

- *What is the fastest way to produce high-impact color graphics?*

- *What are the exact tools I need? Can I really produce <u>all</u> of my graphics with only two handfuls of markers?*

- *I need to know what to do first, second, and so on...is there a "rendering sequence" I can use every time?*

- *Is there a way that I can control exactly where a client looks first, second, etc. in my rendering? Why is that critical?*

- *What are "Color Reactions" and how do they illicit an emotional response from a client?*

- *How do I apply this thinking process at the computer?*

How you will benefit from this course the next day…

- *You'll produce superb graphics with less time at the drawing board and computer*

- *You'll spend far less money on supplies and materials*

- *Your graphics will set you apart from competitors*

- *You'll have greater confidence when you render*

- *You'll understand how to use color more effectively in your design work*
